

How to Setup and Register a FIDO2 Token

Below are topics and steps to walk user's through how to register and setup their FIDO2 token. These steps are outlined in detail in the [FIDO2 End User Guide](#).

Registering a FIDO2 Token Key for Privileged Accounts

ads0 administrative users are required to have a FIDO2 token as the modern authentication method for login into Azure AD and other applications that use Azure AD for authentication. Setting up the FIDO2 Token is similar to the above steps.

Follow the steps below to perform registration:

Step	Instruction	Image
1	For registration guidance, follow the steps in the Registering a FIDO2 Token Key for Privilege Accounts job aid.	 The image is a screenshot of a video player within an internal learning portal. The video title is "SAAM Training" and the specific topic is "Registering a FIDO2 Token Key for Privilege Accounts". The video player shows three people in a professional setting. To the right of the video player, there is a sidebar with a "DOCUMENT" section showing a PDF file named "FIDO2 Privilege accounts (1).pdf" (1.2 MB) with a "DOWNLOAD" button. Below this is a "RECOMMENDATIONS" section titled "MORE FROM THESE AUTHORS" with a count of 39 items. It lists several internal learning items, including "Creating and Configuring an ADS0 Account" (Dec 19, 2022), "myAccess December 2022 Release Summary" (Dec 19, 2022), and "FY23 Requestor - Job Aid" (Nov 19, 2021). The top of the page shows the "accenture" logo and "Knowledge Exchange" header, along with navigation links like "About", "My Activities", "Sites", and a "Contribute" button.

Escalation

If you face any issues, review our [FIDO2 End User Guide](#), [FIDO2 Support](#), and [Registering a FIDO2 Token Key for Privilege Accounts](#) sources for FAQ's, registration and setup guidance. If these resources do not resolve the issue, then proceed to do the following:

Contact your normal service desk and they will be able to assist with troubleshooting of FIDO2 issues. Please note hardware troubleshooting is limited to the approved FIDO2 token within the user guide and may require a replacement if the device is defective.

Most Common FIDO2 FAQ's

- What happens if I lose my FIDO2 key?

- Immediately go into your [My Sign-In's Portal](#) and remove your key from your authentication methods. Once you have removed the key from this site it will no longer allow you to log in using it.
- Immediately after removing your key from Azure please contact ASOC at 1-877-728-0645
- **Can I use multiple FIDO2 keys with my account?**
Yes, however you are limited to 10 FIDO2 keys associated with your account (this number may change in the future)
- **Can I use an old FIDO/FIDO2 key?**
 - Original FIDO and FIDO/U2F keys will not work in our environment. For FIDO2, in addition to FIDO2 compatibility Azure AD requires certain features and extensions be enabled on your FIDO2 key.
 - The easiest way to verify is going to register the key, if it is not compatible you will get an error during registration on the Microsoft MySignIns page.
- **Do I need to return my FIDO2 token when I roll off a project or leave Accenture?**
FIDO2 tokens are not required to be returned if you are rolling out of a project or leaving Accenture. Accenture accounts associated with the tokens will be disabled. Please consult with your supervisor as cases may vary.
