WIFI-Guest FAQ

1. What if the browser does not redirect you to the login portal?

If the browser does not redirect you to the login portal, you should clear the browsing history and type a new address on the browser. The browser should then redirect you to the login portal.

2. If a guest already has an active guest account, can they continue to use it with the new guest Wi-Fi?

No. The new guest Wi-Fi runs on a different vendor software, therefore new credentials are required.

3. How long can you request guest access for?

In the guest form, you have the possibility of selecting different account expiration periods up to one (1) month.
